

Clean Nordic Oceans

The CNO Final Conference

21st – 22nd November 2019
Gothia Towers, Gothenburg, Sweden

CLEAN NORDIC OCEANS INVITE YOU TO OUR CONFERENCE

CNO has become a useful meeting place for various actors working on challenges related to abandoned, lost or otherwise discarded fishing gear.

The main purpose of the CNO network is to exchange knowledge and experience about methods and measures to reduce the effects of ghost fishing, littering of the oceans and to increase recycling from commercial and recreational fishing.

Peter Sundt from Mepex has worked with “plastic” for decades and have a outstanding insight on the topic. Sundt is now a partner in Mepex and will as moderator take us through the conference.

Join us and stay updated on:

- The challenge
- CNO experience, findings and recommendations
- Other Nordic Initiatives
- Global Perspective
- Nordic Perspective
- View from the seafood market

The conference is meant to be more than presentations. Use the opportunity to ask questions and make new contacts.
